PROJECTS

BusGo – Bus Reservation and Management System | *MERN Stack*

- Built a full-stack bus reservation and management system using MongoDB, Express.js, React.js, and Node.js.
- Implemented secure user authentication with password hashing and role-based access control (admin/user) to manage bookings and bus operations.
- Designed RESTful APIs for bus scheduling, seat booking, and reservation management.
- Deployed frontend on Vercel and backend on Render, enabling a live, production-accessible application.
